# Wagner Nurseries

Originators and Growers
PANAMA RHUBARB
Berries, Small Fruits

Citrus and Deciduous Fruit Trees, Roses, Ornamental Trees, Shrubs, Vines & Bulbs

## Trade Price List

1926-1927

September 1, 1926

Office, Store and Nursery 1350 North Foothill Blvd. Pasadena, Calif.

P. O. Box 56, Lamanda Park, Calif.

#### Wagner Everbearing Strawberry

The Wagner Everbearing Strawberry has been grown by us on our grounds for several years and has proved to be a persistent heavy cropper-the old plants bear heavy crops for five to six years. It is as good today as ever—the best long season cropper or everbearing that ever was grown on the coast. It has proved a success in Arizona and other hot sections where no other berry would It is vigorous and produces immense crops of the largest size fruit. Plants should be given double the space in field required by other strawberries, as the plant is the most vigorous and grows the largest of any berry we ever tried. It is bound to take the place of all other everbearing sorts.

#### Panama Rhubarb

Wagner's Panama Rhubarb is at the present absolutely the BEST you can buy or offer YOUR TRADE in the way of a winter producing rhubarb. Don't fail to list it and recommend it, and at prices quoted a very nice profit can be made. On any large orders or prospects turned over to us, if sold, we will protect you to the fullest extent.

### Wagner's Purple Raspberry

It is the only raspberry of a purple or black cap nature that is a success in Southern California and will produce the largest crop of any raspberry known and finds a ready market at all times.

### Wagner's Rose Dewberry

This is the earliest of any Dewberry or Blackberry to be found, producing an abundant crop which starts to ripen in March, at a time when berries are worth in the neighborhood of 20 to 25 cents a box net to the grower and bearing over a period until the other blackberries come into the market. You cannot recommend this berry too highly to your trade for either commercial or home use.
